

Contents

Part I Classification and Clustering

Non parametric classification

Multi-Class Budget Exploratory Trees <i>Massimo Aria</i>	3
Methods to Compare Nonparametric Classifiers and to Select the Predictors <i>Simone Borra, Agostino Di Ciaccio</i>	11
Variable Selection in Cell Classification Problems: a Strategy Based on Independent Component Analysis <i>Daniela G. Calò, Giuliano Galimberti, Marilena Pillati, Cinzia Viroli</i> .	21
Simplifying Classification Trees through Consensus Methods <i>Rossella Miglio, Gabriele Soffritti</i>	31
Selecting the Training Set in Classification Problems with Rare Events <i>Bruno Scarpa, Nicola Torelli</i>	39

Clustering and dissimilarities

A Classification and Discrimination Integrated Strategy Conducted on Symbolic Data for Missing Data Treatment in Questionnaire Survey <i>Maria Gabriella Grassia</i>	47
A Collinearity Based Hierarchical Method to Identify Clusters of Variables <i>Annalisa Laghi, Gabriele Soffritti</i>	55
On the Dynamic Time Warping for Computing the Dissimilarity Between Curves <i>Isabella Morlini</i>	63
Metrics in Symbolic Data Analysis <i>Luciano Nieddu, Alfredo Rizzi</i>	71

Constrained Clusterwise Linear Regression <i>Antonella Plaia</i>	79
Crossed Clustering Method on Symbolic Data Tables <i>Rosanna Verde, Yves Lechevallier</i>	87

Part II Multivariate Statistics and Data Analysis

Some Statistical Applications of Centrosymmetric Matrices <i>Estela Bee Dagum, Laura Guidotti, Alessandra Luati</i>	97
Selection of Structural Equation Models with the PLS-VB Programme <i>Giuseppe Boari, Gabriele Cantaluppi</i>	105
Web Robot Detection - Preprocessing Web Logfiles for Robot Detection <i>Christian Bomhardt, Wolfgang Gaul, Lars Schmidt-Thieme</i>	113
Data Dependent Prior Modeling and Estimation in Contingency Tables. The Order-Restricted RC Model <i>Giulio D'Epifanio</i>	125
PLS Typological Regression: Algorithmic, Classification and Validation Issues <i>Vincenzo Esposito Vinzi, Carlo N. Lauro, Silvano Amato</i>	133
Weighted Metric Multidimensional Scaling <i>Michael Greenacre</i>	141
An Improved Majorization Algorithm for Robust Procrustes Analysis <i>Patrick J.F. Groenen, Patrizia Giaquinto, Henk A.L. Kiers</i>	151
Generalized Bi-additive Modelling for Categorical Data <i>Patrick J.F. Groenen, Alex J. Koning</i>	159
Model Selection Procedures in Three-Mode Component Models <i>Pieter M. Kroonenberg</i>	167
Principal Component Analysis for Non-precise Data <i>Carlo N. Lauro, Francesco Palumbo</i>	173
A New Version of the Structural Dynamic Model with Unique Latent Scores <i>Simona Caterina Minotti, Giorgio Vittadini</i>	185
Some Issues About the Use of Experts <i>Paola Monari, Patrizia Agati</i>	193

Nonparametric Methods in Survey Sampling <i>Giorgio E. Montanari, M. Giovanna Ranalli</i>	203
A Different Approach for the Analysis of Web Access Logs <i>Gabriella Schoier, Giuseppe Melfi</i>	211
Blending Statistics and Graphics in Visual Data Mining <i>Antony Unwin</i>	217
Confidence Regions in Multivariate Calibration: a Proposal <i>Diego Zappa, Silvia Salini</i>	225

Part III Applied Multivariate Statistics

Environmental data

Nonparametric Analysis of Air Pollution Indices Compositions <i>Francesca Bruno, Daniela Cocchi, Meri Raggi</i>	235
VAR Models for Spatio-temporal Structures: an Application to Environmental Data <i>Aldo Lamberti, Alessia Naccarato</i>	243
Analysis of Spatial Covariance Structure for Environmental Data <i>Aldo Lamberti, Eugenia Nissi</i>	251

Microarray data

Bayesian Clustering of Gene Expression Dynamics: An Application <i>Sara Lodi, Paola Sebastiani, Daniela Cocchi, Marco Ramoni</i>	259
A Hierarchical Mixture Model for Gene Expression Data <i>Luisa Scaccia, Francesco Bartolucci</i>	267

Behavioural and text data

Sequence Analysis of BHPS Life Course Data <i>Arnstein Aassve, Francesco C. Billari, Raffaella Piccarreta</i>	275
Robust Multivariate Methods for the Analysis of the University Performance <i>Matilde Bini</i>	285
Some Insights into the Evolution of 1990s' Standard Italian Using Text Mining Techniques and Automatic Categorization <i>Sergio Bolasco, Alessio Canzonetti</i>	293
Evaluating Undergraduate Education through Multiple Choice Tests <i>Franca Crippa</i>	303

A New Approach in Business Travel Survey: Multivariate Techniques for Strata Design <i>Andrea Guizzardi</i>	311
Value-Orientations and Partnership <i>Rossella Miglio, Lucia Pasquini, Alessandra Samoggia, Gabriele Soffritti</i>	317
An Item Response Theory Model for Student Ability Evaluation Using Computer-Automated Test Results <i>Stefania Mignani, Silvia Cagnone, Giorgio Casadei, Antonella Carbonaro</i>	325
Financial data	
Functional Cluster Analysis of Financial Time Series <i>Andrea Cerioli, Fabrizio Laurini, Aldo Corbellini</i>	333
The Role of the Normal Distribution in Financial Markets <i>Michele Costa, Giuseppe Cavaliere, Stefano Iezzi</i>	343
Functional Principal Component Analysis of Financial Time Series <i>Salvatore Ingrassia, G. Damiana Costanzo</i>	351
Elliptically Symmetric Distributions: a Review of Achieved Results and Open Issues <i>Fiorella Romito</i>	359
Authors and Keywords Index	367
